

NIPPY Clearway Carer Competency

Name

Job Title

Patient

Company

Date Completed

Signed by Line Manager

Competency will be achieved through a combination of self-assessment, discussion with peers/line manager, completion of the matrix and sign off by line manager as appropriate.

On achievement of competency the carer will be able to:

- Explain the protocol for use of the device
- Navigate confidently around the device and turn it on and off
- Demonstrate the ability to administer the procedure safely and effectively for the given patient
- Explain the cleaning and maintenance protocol for the device

Prior to completing training on the NIPPY Clearway, the carer should have an understanding of the following:

- Normal respiratory pattern
- Signs and symptoms of respiratory distress
- Signs of secretion retention
- Severe difficulty in breathing
- When to seek emergency help
- Signs and symptoms of an infection
