

Quality Policy

Mission

To improve the quality of life and care of respiratory patients around the world through a personal commitment to innovation, quality and customer focus.

Quality Commitments

- We always place patient safety first and consider that quality is a personal responsibility of every employee, across all functions throughout the whole company.
- We never take shortcuts that would compromise quality.
- We continuously strive to get better, improve the design and manufacturing of our products, simplify and enhance our processes to exceed the expectations from our customers and regulatory bodies.
- We have adequate systems in place and combine them with sound individual judgements.

Quality Essentials

- We comply with safety, regulatory and other applicable requirements.
- We maintain an effective Quality Management System.
- We set and review Quality objectives throughout the organization.
